

CONGRATULATIONS TO MELVA JONES, ROBERT WOOD JOHNSON FOUNDATION AWARD RECIPIENT

HON. ELIJAH E. CUMMINGS

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Friday, June 9, 2000

Mr. CUMMINGS. Mr. Speaker, I am proud to rise today to congratulate a remarkable woman, Melva Jones, who was recently chosen as one of only ten people nationally to receive the Robert Wood Johnson Foundation's Community Health Leader award. The award is considered the nation's highest honor for community health leadership and includes a \$100,000 grant to help further her work.

Ms. Jones is the director of the Mattie B. Uzzle Outreach Center in Baltimore, which provides street outreach to help people with substance abuse problems get treatment, counseling, food, clothing, and emergency funds. The center, which is located in a neighborhood with one of the state's highest substance abuse rates, also offers housing, job referrals, free testing for HIV, and community education programs on drug-related issues.

Ms. Jones, who is a native of my district in Baltimore, gave up a lucrative nursing administration career to help found the center in 1994 after watching drug abuse transform a once-thriving neighborhood into streets of boarded up houses. The center is a "neighbor" to residents in this community and has steered more than 2,500 people into drug treatment programs since its inception. It also boasts a forty-five percent recovery rate, which is 10 percent higher than the national average.

With her hands-on approach, Ms. Jones has been instrumental to the success of the program. A visible force in the neighborhood every day, she serves as a welcome sight to a community that is all too familiar with the horrors of drug addiction up close. With a reputation for persistence and tough love, she makes regular rounds to find people in need and coax them into treatment.

Mr. Speaker, Melva Jones has demonstrated true leadership by addressing one of the most difficult problems in our community and it comes as no surprise that she was selected for this distinguished award. Although much more needs to be accomplished in the fight against substance abuse, in Baltimore and across the United States, it is a comfort to know that there are people like Ms. Jones on the street, working every day.

STAR WARS

HON. DENNIS J. KUCINICH

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Friday, June 9, 2000

Mr. KUCINICH. Mr. Speaker, I submit the following for the CONGRESSIONAL RECORD.

STAR WARS II

HERE WE GO AGAIN

(By William D. Hartung and Michelle Ciarrocca)

If you stopped worrying about the bomb when the cold war ended, you were probably surprised to learn that two of the hot-button issues of the eighties—arms control and mis-

sile defense—will top the agenda at the Clinton/Putin summit on June 4-5. A central issue in Moscow will be how to reconcile Russian President Vladimir Putin's proposal for deep cuts in US Russian nuclear arsenals with the Clinton Administration's fixation on developing a National Missile Defense (NMD) system.

Clinton has pledged to make a deployment decision this fall, after the Pentagon and the White House analyze the results of the next "hit to kill" test of the missile defense system, slated for late June or early July. The system failed its most recent test, conducted in January, while an allegedly successful test conducted last October was made possible only by the fact that the kill vehicle was guided to the right spot by a large, easy-to-find decoy balloon.

The Clinton/Gore proposal is a far cry from Ronald Reagan's Star Wars scheme, which was designed to fend off thousands of Soviet warheads at a cost estimated by former Wisconsin Senator William Proxmire at up to \$1 trillion. In contrast, this missile defense plan is meant to deal with a few dozen incoming warheads launched by a "rouge state" like North Korea, at a projected cost of \$60 billion. But despite the NMD's seemingly more modest goals, it is every bit as dangerous and misguided as the Reagan scheme, threatening to unravel thirty years of arms-control agreements and heighten the danger of nuclear war.

NMD's surprising political revival is rooted in the three Cs of contemporary US politics: conservative ideology, Clintonian cowardice and corporate influence. These short-term pressures are in turn reinforced by an ambitious long-range military objective: the misguided quest for a state of absolute military superiority.

The strongest push for missile defense has come from Reaganite true believers in conservative think tanks, especially the small but highly effective Center for Security Policy. On Capitol Hill, the NMD lobby is spearheaded by new-look conservatives like Senator Jon Kyl of Arizona, who led last fall's successful Republican effort to defeat the Comprehensive Test Ban Treaty. Fresh from that victory, the NMD lobby is now seeking to destroy the Anti-Ballistic Missile treaty as the next target in its campaign to promote "peace through strength rather than peace through paper," as Kyl put it in a recent speech.

The right-wing crusade for missile defense has received aid and comfort from Bill Clinton and Al Gore, who have decided that looking "tough" on defense is more important than protecting the world from weapons of mass destruction. Support has also come from the lumbering behemoths of the military-industrial complex: Lockheed Martin, Raytheon and Boeing, which are desperately seeking a new infusion of taxpayer funds to help them recover from a string of technical failures and management fiascos that have cut their stock prices and drastically reduced their profit margins.

NMD's military boosters see the system primarily as a way to enhance the offensive capabilities of US forces, not as a defensive measure. In its revealing "Vision for 2020" report, the US Space Command—a unified military command that coordinates the space activities and assets of the Army, Navy and Air Force—sings the praises of outer space as the ideal platform for projecting US military dominance "across the full spectrum of conflict." Pentagon hard-liners have a more immediate military goal: using NMD as a shield to protect US forces in interventions against states like North Korea (whose missile development effort, it is worth noting, has been on hold for almost two years).

A growing number of moderate-to-conservative Democrats are also supportive of a limited NMD system. Whether or not missile defense is an effective response to alleged threats, it seems to offer a sense of security to some members of Congress, who lack the expertise and inclination to question the fevered threat projections of the US military and intelligence establishments.

While at least some of the motives of NMD advocates may be understandable, they are also disastrously misguided: Even Clinton and Gore's "limited" system is unnecessary, unworkable and unaffordable. The mere pursuit of an NMD system could pose the most serious threat to international peace and stability since the height of the cold war. Russian President Putin has emphatically stated that any US move to withdraw from the ABM treaty will lead Moscow to treat all existing US/Russian arms agreements as null and void. And China's chief arms negotiator, Sha Zukang, has warned that if Washington goes ahead with an NMD deployment designed to intercept "tens of warheads"—a figure suspiciously close to the eighteen to twenty single-warhead ballistic missiles that represent China's entire nuclear deterrent capability—Beijing will not "sit on its hands."

In short, the official Clinton/Gore Administration position on NMD is that we should jeopardize the best change in a generation to reduce the world's nuclear arsenals in order to preserve the option to deploy a costly, technically dubious scheme designed to defend against a Third World missile threat that does not currently exist and may not ever materialize. To understand how we got into this mess, we need to take a look at the genesis, "death" and resurrection of Reagan's Star Wars dream.

A SMILE AND A SHOESHINE

When Reagan gave his March 1983 Star Wars speech, in which he pledged to launch a program designed to render nuclear weapons "impotent and obsolete," he was acting primarily on the advice of Edward Teller, the infamous "father of the H-bomb." In closed-door meetings organized by the conservative businessmen in Reagan's kitchen Cabinet, Teller sold Reagan on a new nuclear doctrine of "assured survival" based on the alleged technical wonders of his latest brainchild, the X-ray laser. As New York Times science writer William Broad pointed out in his 1992 book, *Teller's War*, the X-ray laser was largely a figment of Teller's imagination, composed of scientific speculation, wishful thinking and outright deception. But Reagan was buying into the concept of missile defense, not the details, so he forged ahead unaware of these inconvenient facts, his enthusiasm reinforced by his desire to counter the nuclear freeze movement.

But, as Frances FitzGerald shows in her new book, *Way Out There in the Blue* (the title derives from Arthur Miller's line in *Death of a Salesman* in which he describes Willy Loman as "a man way out there in the blue, riding on a smile and a shoeshine"), Reagan's Star Wars proposal was more than just a political con game; it was also a potent symbol that served radically different purposes for the different factions within his Administration. For hard-liners like Caspar Weinberger, Richard Perle and Frank Gaffney—a Perle protege who went on to found his own pro-Star Wars think tank, the Center for Security Policy—Reagan's missile defense plan offered a chance to promote their two main goals: sustaining the Reagan military buildup and thwarting progress on US/Soviet arms control. For White House political strategists, the Star Wars plan was a way to boost Reagan's flagging popularity ratings, which had plummeted in the face of
